

Application for Hosting EACTA Vascular Anaesthesia Exchange Training Programme

Institution's Name	Hosital Clínic de Barcelona		
Address	Carrer Villarroel 170		
Department	Anesthesiology, Critical Care	Website	www.hospitalclinic.org
City	Barcelona	ZIP code/Postal code	08036
Country	Spain	Phone	+34932275558
Fax	Click here to enter text.	Email	rmatute@clinic.cat

Programme Supervisor

Name / Surname	Purificación Matute Jiménez (PMJ)
Board Certification(s)	Members of EACTA Thoracic Sub-committee, education for Adult transesophageal echocardiography
Title/Affiliation	Ph, MD; Consultant in Anaesthesiology, group of Cardiovascular and thoracic Anaesthesia

Will the Programme director devote sufficient time to provide substantial leadership to the programme and supervision for the fellows? Yes No

Language requirements:

English or Spanish. (Fluency).

Specific legal or other requirements of an attending trainee:

Anesthesiology specialist

Preferred Duration 1 week 2 weeks 3 weeks 4 weeks others 2-4 weeks periods

Preferred Months January February March April May June

July August September October November December

Preferred Seniority Level Junior Experienced Very Experienced

Number of Positions Per Year

6

Financial Statement

Accommodation is provided Yes No
Transportation/travel options are provided Yes No
 This opportunity is not funded by the centre Yes No

Source of financial support for the candidate:

- Host centre
- Candidate 's centre
- Scholarship
- Educational grant
- Award
- Candidate's own expenses
- Others

Please, describe Hospital Clinic does not offers financial support sources for the trainers. Others sources are admitted

Aims, goals and objectives of the Exchange Training Programme

To acquire technical skills in preoperative assessment, anaesthesia, monitoring and postoperative care o vascular surgery including both conventional vascular major surgery (aortic, carotid) , complex endovascular surgery (TEVAR, EVAR) and pheripheral vascular surgery. T his four **weeks' Training period** as **Observer** has the aim to improve the practical knowledge

Clinical interests

The Anaesthesiologists of the Cardiothoracic Section of Hospital Clinic are a group of Anaesthesiologists who work exclusively with the Thoracic, Cardiac and Vascular surgical patients.

The group is specially focused in:

- Improvement of the perioperative care Vascular patients,
- Implementation of ERAS,
- Open abdominal aortic procedures (aortic thoracic open surgery is performed by cardiac surgeons).
- Endovascular aortic procedures (EVAR, TEVAR, CHIVAR...), including medular ischemia protective management and techiques.
- Endovascular aortic emergencies (anesthesiologist duty team).
- Paraplegia in vascular surgery (protective techniques: drain of SCF, sensitive/motor evoked potentials)
- Carotid open endarterectomy and stent procedures.
- Anesthesia for peripheral vascular procedures.
- Care and pain management for patients with critical limb ischemia and undergone limb amputation
- Transesophageal echocardiography
- Thoracic and epidural blockade.
- Ultrasound-guided locoregional blockages (upper and lower limb).
- Multimodal analgesia protocol.
- Improvement of the perioperative care of Thoracic and Cardiac patients, including the establishment of prehabilitation programme (for vascular patients we are start to desing the protocol of prehabilitation)

Lab interests

We have and are currently participating in multicentric trials endorsed by the ESA and EACTA (OBTAIN, MET-REPAIR

Resources

Check if each of the following is available at your centre.

Resource	Yes	Number	Working days per week
Number of working days per week		7	7
Total dedicated ward beds for vascular surgery		10	7
Number of ICU beds dedicated to vascular surgery patients	<input checked="" type="checkbox"/>	2	7
Post-anaesthesia care unit for vascular patients	<input checked="" type="checkbox"/>	3	7
Monitoring and advanced life support equipment	<input checked="" type="checkbox"/>	2	7
Dedicated operating rooms for vascular surgery	<input checked="" type="checkbox"/>	1	4-5 (every 2 weeks 4)
Interventional vascular facility	<input checked="" type="checkbox"/>	1	1
Outpatient Clinic for perioperative evaluation of patients undergoing vascular procedures	x	1	2
24-hours acute pain service available for patients undergoing vascular procedures	<input checked="" type="checkbox"/>	1	7
Meeting Rooms	<input checked="" type="checkbox"/>	3	7
Classrooms with visual and other educational aids	<input checked="" type="checkbox"/>	2	7
Study areas for trainees	<input checked="" type="checkbox"/>	2	7
Office space for faculty members and trainees	<input checked="" type="checkbox"/>	3	7
Diagnostic facilities	x	1	7
Therapeutic facilities	x	1	7
24-hour laboratory services available in the hospital	x	1	7

Clinical Training

Number of performed procedures / week around 8-12 procedures
(If one week there are more procedures of major surgery, ie AAA open surgery, we perform less cases of another shorter surgery during week, the number of cases are depend of weekly schedule surgery, the number of procedures anoted in the table are approximately)

Aortic abdominal open surgery	4 hours/procedure	1-2/week
Carotid surgery	2 hours/procedure	1-2/ week
Endovascular Surgery (EVAR/TEVAR)	3 hours/procedure	2/week
Complex endovascular surgery	6-7 hours procedure	1-2/month
Peripheral vascular surgery (open)	3 hours/procedure	2-3 week
Peripheral endovascular surgery	2 hours procedure	3-4/week
Limb amputations	1 hour/procedure	2-3/week
Arterious venous fistula	1 hour /procedure	3-4/week

Academic Education

Patient Care

Competency Area	Settings/Activities
Following the standards for patient care and established guidelines and procedures for patient safety, error reduction, and improved patient outcomes.	OK (Surgical check list)
Pre-operative patient evaluation and optimization of clinical status prior to the complex and minor vascular procedures.	OK,
Interpretation of cardiovascular and neuromonitoring data.	OK ((LIDCO, NIRS)
Objectives, indications, and targets of cerebrospinal fluid drainage.	OK (liquoguard monitoring)
Pharmacological and mechanical circulatory support.	OK
Peri-operative critical care, including ventilatory support and peri-operative pain management.	OK (e.g. NIV, CPAP, ...)
Providing anaesthesia care for patients undergoing open and endovascular vascular surgery.	OK

Medical Knowledge

Indicate the activity(ies) (lectures, conferences, journal clubs, clinical teaching rounds, etc.) in which trainees will demonstrate knowledge in each of the following areas. Also indicate the method(s) used to assess competence.

Area of Knowledge	Settings/Activities
Embryological development of the thoracic aorta and major vessel structures.	Weekly Clinical Session of Anaesthesiology for specialists and residents. Twice per week residents' teaching
Pathophysiology, pharmacology, and clinical management of patients undergoing vascular procedures.	Weekly Clinical Session of Anaesthesiology for specialists and residents. Twice per week residents' teaching
Pre-anaesthetic evaluation and preparation of adult vascular patients.	Weekly Clinical Session of Anaesthesiology for specialists and residents. Twice per week residents' teaching
Invasive and minimally-invasive haemodynamic and neurological monitoring.	Weekly Clinical Session of Anaesthesiology for specialists and residents. Twice per week residents' teaching
Pharmacokinetics and pharmacodynamics of medications prescribed for clamping and de-clamping of thoracic and abdominal aorta.	Weekly Clinical Session of Anaesthesiology for specialists and residents. Twice per week residents' teaching

Area of Knowledge	Settings/Activities
Pain management of adult vascular surgical patients.	Weekly Clinical Session of Anaesthesiology for specialists and residents. Twice per week residents' teaching
Pain management for phantom limb pain.	Weekly Clinical Session of Anaesthesiology for specialists and residents. Twice per week residents' teaching
Quality assurance/ improvement.	Weekly Clinical Session of Anaesthesiology for specialists and residents. Twice per week residents' teaching
Ethical and legal issues, and practice management.	Weekly Clinical Session of Anaesthesiology for specialists and residents. Twice per week residents' teaching

Evaluation of Trainees

- The Programme Supervisor will give an appraisal for each fellow following the observership. Yes No
- The centre will be able to maintain a register of those fellows who have entered and successfully completed a training programme. Yes No

Other Comments:

- I. Attendance to the Aorta Committee: once weekly. Patients with aortic disease are reviewed and discussed. The Aorta Committee is a multidisciplinary Committee (cardiac surgeons, vascular surgeons, anaesthesiologists, interventional radiologists and cardiologists). Patients are scheduled for surgery (yes/not), open/endovascular, cardiac or vascular surgery. The trainees would attend to the aorta committee and afterwards to the OR. Surgical vascular activity starts after Aorta Committee (8:00 -8:45)
- II. Chapter of books (in relationship whit this application) (in Spanish)
 1. Gomar C, **Matute P**. Anestesia para cirugía vascular. En F.E.E.A eds. Ediciones Ergón, S.A. 2005:577-622. ISBN: 84-8473-336-X
